I. Information

1. Team members:

No.	Name	ID
1	Lê Hoàng Khanh Nguyên	20127679
2	Nguyễn Minh Quang	20127605
3	Lăng Thảo Thảo	20127629
4	Lê Hoài Phương	20127598

2. Teaching assistants:

- Mr. Bui Tan Loc
- Mr. Tran Duy Thao
- Mr. Nguyen Van Vu

II. Introduction:

1. The idea:

- **Product name:** SUN (Simple Unique Network)
- **Description:** An intermediary website that establishes a network of stores to schedule laundry and home delivery.
- **Reason:** Nowadays, everyone is busy with works (at school, university, company...) and uses a variety of uniforms in many different events. Most people don't have time to wash (even with the support of washing machine), dry and iron them in short time. It is the cause of many people not having suitable clothing for important events. Therefore, the team has decided to create a network where customers and owners of the above services can reach each other more easily, quickly, and conveniently with just a click of a mouse.

2. Target users and environments:

- Target users: Laundry and Dry-cleaning shops, customers, shippers
- Environments: Web (Client-Server)

3.Key features:

Customer:

- Account management:
 - + Sign up, sign in
 - + User information
 - + Payment methods
- Browsing menu:
 - + Suggestion, promotion
 - + Search and filter
 - + Service details
 - + Order service menu
 - + Order delivery status (from Shipper)
 - + Shop or Shipper Rating/ comment
 - + Favorite shop
 - + Chat support/ feedback

Sellers:

- Management settings:
 - + Account settings
 - + Shop information
 - + Sign up for advertising
 - + Update service in shop list
 - + Mark suggested service
 - + Customer service chat
- Weekly revenue chart

Shippers:

- Accept order
- Texting/calling
- Notifications
- Process tracking options:
 - + Arrived at address → Collected item from customer → Delivered to shop
 - + Received item from shop → Arrived at address → Delivered to customer

III. Tool setup:

- **Team Google Drive folders:** storing documents and team's process overview.
https://drive.google.com/drive/folders/1tschPrmHQi74ySSmA9oXWVyTn70BFMIN?usp=share_link
- **Moodle:** posting and submitting assignments.
- **Messenger group:** communicating between members in the team.
- **Slack group:** It is said to be created by TAs for asking teacher for support.
- **Github:** upload source code of the project.
https://github.com/MiwaUS7605/Intro2SE_Group06_Sunflower
- **Trello:** It is said to be created by TAs for following and completing sprints on time, note errors to fix them later.
However, due to not receiving any contact regarding Slack and Trello yet, we created our temporary workspace:
Slack invite:
